About the program

This program is run by a multidisciplinary treatment team and is designed for people who want to identify, understand and change unhelpful patterns of thinking which may be negatively affecting their day-to-day lives.

Cognitive Behaviour Therapy (CBT), deals with the 'here and now' - how your patients current thoughts and behaviours are affecting them now. CBT recognises that events from the past help shape the way people think and behave. It does not dwell on past events but aims to find solutions on how to change your patients current thoughts and behaviours, so they can function better in the future.

When is it held?

Once a week. Wednesdays 9:15am to 3:00pm, over eight weeks. Morning tea and lunch is provided.

How to join

Patients interested in attending this program will need a referral to a Psychiatrist with admission rights to Belmont Private Hospital.

How much does it cost?

Patients are admitted as a day patient and as such, can claim their attendance via their health fund. We ask that patients confirm any applicable out-of-pocket excess or gap costs directly with Belmont Private Hospital.
