

FOR VISITORS

Novel Coronavirus2019 (COVID-19) Information 06/03/2020

Be aware that our patients may be susceptible to any respiratory illness. If you are unwell for any reason please consider calling on the phone or returning when you are well.

If you or a close household member:

- have been in or transited through a country at risk of COVID-19 infection (that is Mainland China, Iran, Italy, South Korea, Cambodia, Hong Kong, Indonesia, Japan, Singapore or Thailand) and / or
- you have been in contact with a person with confirmed case of COVID-19 or suspect that you may have come into contact with a confirmed case of COVID-19 and / or
- you develop a fever or respiratory illness like symptoms you must follow the advice of public health authorities AND

DO NOT ENTER THE HOSPITAL OR VISIT OUR PATIENTS FOR 14 DAYS

Please be aware of the signs and symptoms of the COVID-19 illness (infection).

Common signs of the illness (infection) include a high fever and respiratory symptoms (a cough, shortness of breath, runny nose, tiredness and breathing difficulties). In more severe cases, the infection can cause pneumonia, severe acute respiratory syndrome, kidney failure etc.

If you develop signs and symptoms of this illness please contact your GP or nearest public hospital emergency department immediately

If you are concerned please contact the Public Health Unit in your Area for further information.

Reduce your risk of coronavirus infection:

Clean hands with soap and water or alcohol-based hand rub

Cover nose and mouth when coughing and sneezing with tissue or flexed elbow

Avoid close contact with anyone with cold or flu-like symptoms

Thoroughly cook meat and eggs

No unprotected contact with live wild or farm animals
